To Whom It May Concern:

We have had the pleasure of dealing with Hayman Construction Inc. on a number of projects in recent years where they were the General Contractor for the construction of both new stores and additions and renovations to our existing facilities.

These included new stores in Sarnia (2002) and two in London (2005 and 2006), ranging in size from 91,000 to 120,000 sf and in value from \$6.5 to \$9.5 million. Hayman Construction has also performed several renovation projects at our existing stores in the \$50,000 - \$350,000 range.

In all cases, we found Hayman's workmanship to be of the highest quality, and all projects were completed in accordance with our strict scheduling requirements, allowing the stores to open on time as planned.

Hayman Construction's team approach was most appreciated. They effectively coordinated the complex construction tasks between all the major parties, including Home Depot, the consultants, the subcontractors and their own work force to ensure that everyone worked efficiently and safely towards the common goal of producing an excellent finished building. We found their field superintendents and office project managers to be most helpful and cooperative in making these projects a success.

Home Depot hopes to have the opportunity of working with Hayman Construction again in the future, and we heartily recommend them to anyone looking for a general contractor of the highest quality for their construction projects, big or small.

Yours truly,

**HOME DEPOT OF CANADA INC.**
